

Check whether 45 is divisible by 9. First explain the divisibility rule of 9, second think and solve step-by-step, third explain the final answer with an yes or a no.

The Divisibility Rule for 9

A number is divisible by 9 if the **sum of its digits** is also evenly divisible by 9.

Step-by-Step Solution

To check if 45 is divisible by 9, we apply the rule:

1. **Identify the digits:** The number 45 is made up of the digits 4 and 5.
2. **Add the digits together:** $4 + 5 = 9$.
3. **Check the sum:** The sum is 9. Since 9 is divisible by 9 ($9 / 9 = 1$), the original number also passes the test.

Final Answer

Yes, 45 is divisible by 9.

"This pc is powerful."

Analyze why the above statement is weak.

Identify the critique points

Rewrite the missing points with clarity and value

Here is an analysis of why "This pc is powerful" falls flat, along with specific critiques and stronger alternatives.

Why the Statement is Weak

The statement suffers from the "tell, don't show" problem. It relies entirely on a subjective adjective ("powerful") without providing the context, evidence, or specific use cases required to make the claim believable. Because "powerful" means entirely different things to a casual web browser, a hardcore gamer, and a professional video editor, the statement ultimately communicates very little real information.

The Core Critique Points

Subjective Ambiguity: "Powerful" is relative. A PC that is powerful for editing spreadsheets might freeze when trying to render a 3D animation.

Zero Evidence: It makes a claim without backing it up with technical specifications (CPU, GPU, RAM, storage speed) to prove *why* it is powerful.

Missing Target Audience: It doesn't identify who this power is meant for.

No Value Proposition: It fails to translate the machine's capabilities into a tangible benefit for the user (e.g., saving time, running games smoother, multitasking without lag).

Rewriting for Clarity and Value

To fix the statement, you need to replace the vague adjective with concrete facts and clear user benefits. Here are a few ways to rewrite it depending on what you are trying to communicate:

1. For a Gamer (Focus on Performance Metrics)

The Rewrite: "Equipped with an RTX 4090 and an Intel Core i9, this PC effortlessly maintains 120 FPS in modern AAA games at 4K resolution."

Why it works: It names the specific hardware and gives a concrete, measurable performance metric that matters to the target audience.

2. For a Creative Professional (Focus on Time and Workflow)

The Rewrite: "With 64GB of DDR5 RAM and a 24-core processor, this workstation cuts 4K video rendering times in half and allows you to scrub through massive timelines without stuttering."

Why it works: It translates "power" into a direct, valuable benefit: saving time and removing workflow frustrations.

3. For Everyday Multitasking (Focus on Smooth Experience)

The Rewrite: "Built for heavy multitasking, this desktop lets you keep dozens of browser tabs open, stream music, and run heavy data spreadsheets simultaneously without slowing down."

Why it works: It defines "power" in the context of everyday office or home use, making the capability relatable to a general user.

Create two email subjects for customer service for the compensation of delivering a wrong product.

1. Write two variations

2. Clarify which is better written

Here are two variations for the customer service email subject line, along with an analysis and a final improved version.

1. Two Variations

Variation A: Apology and Compensation: Wrong Item Delivered for Order [Order Number]

Variation B: Making It Right: Your Refund and Replacement Details Inside

2. Which is Better Written?

Variation B is the better-written subject line.

While Variation A is highly informative, it focuses heavily on the negative aspect of the transaction ("Apology," "Wrong Item"). Variation B, on the other hand, shifts the tone to be positive, action-oriented, and focused on the resolution ("Making It Right"). Customers looking at a flooded inbox are more likely to respond positively to an email that immediately promises a solution rather than one that just reminds them of the mistake.

However, Variation B's weakness is that it is a bit vague and lacks the immediate, recognizable context that a customer might need to know the email is legitimate and not spam.

3. The Improved Version

To create the best possible subject line, we will take the strongest point from Variation A (the clear reference to the specific order context) and blend it with the strong, resolution-focused opening of Variation B.

Improved Subject Line:

Making It Right: Compensation Details for Your Recent Order [Order Number]

Why this works: It keeps the positive, customer-first framing ("Making It Right"), clearly states what is inside the email ("Compensation Details"), and provides immediate legitimacy so the customer knows exactly what transaction is being discussed ("Order [Order Number]").
